Experience

- Intern at Caring Hands:

Redesigned and digitized their operational workflow by creating a robust document tracking and management system using HTML, CSS, JavaScript, and PHP. This transformation significantly improved efficiency and streamlined processes.

Projects

- TrendTurnover: E-Commerce website for second-hand clothing, developed using React, featuring a donation option and a seamless user experience for buying, selling, and donating clothes.
- BooksMuse: A bookstore management system built with React and SQLite to manage inventory, order tracking, and database operations efficiently.
- Hospital Management System: Built using Python and SQL Database, leveraging Python libraries for frontend development.
- Spotify Clone: Built using React, designed the frontend of Spotify.

Courses and Certifications

- Introduction to Generative AI
- Prompt Design in Vertex AI
- CS50's Introduction to Databases with SQL

Additional

- Languages: Fluent in English, Hindi, Marathi, Sindhi
- Hobbies: Reading, Writing, Chess
